The Department of Public Works has completed a study to better understand the Town's infrastructure assets related to Transportation and Mobility. This includes collecting and assessing the pavement condition and ADA/PROWAG compliance for all town owned public ways, sidewalk, and ramps. The Department's primary goal is to establish benchmarks and coordinate infrastructure improvements to leverage available funding in an efficient, effective and transparent manner benefitting Brookline residents, businesses and visitors.

The Department welcomes you to join us for our second public forum to continue the conversation regarding pavement rehabilitation and maintenance technologies, costs, processes, policies and prioritization and budget for the Town's roadways and sidewalks.

Any questions about the meeting should be directed to Transportation Administrator, Todd Kirrane, at tkirrane@brooklinema.gov.
