Webinar ID: 161 962 0510

Passcode: 99014457

This committee is charged with the task of **studying the** issues associated with surveillance technology and military-type equipment, including the use of such equipment in Brookline and any local, state, or federal policies or regulations governing them. The committee has been reviewing the often complicated issues presented by the use of surveillance technology and military-type equipment as they relate to governmental entities in Brookline.

We hope you will join us to learn about **and provide your comments on the** work of the Committee to-date and its preliminary reports on the trade-offs between privacy and security, the use of military-type equipment in Town, the use of face surveillance technology, and computer security and privacy principles.
