SAVE THE DATES!

There are lots of interesting courses being offered by Brookline Adult & Community Education (BA&CE) starting in January that are of particular interest to Brookline seniors. Among them:

Continuing to Drive Past 55

Course Code: N055

This course will be held on three Thursdays beginning on January 29 with classroom discussions and individual behind-the-wheel sessions—all designed to help refine existing driving skills and develop some safer defensive driving techniques on the road.

Computer Basics for Seniors

Course Code: C116

Sponsored by the Council on Aging and being given at the Senior center, there will be two sections of four sessions each—the first section starting January 8 and the second starting February 5. Don't let a mere machine continue to daunt you! Strike back by learning its ways and wherefores.
