

ADDENDUM 2

**TRANSPORTATION DEMAND MANAGEMENT
(TDM)**

TDM SUMMARY

To reduce vehicular travel demand, the proposed development will consider the following Transportation Demand Management strategies:

1. Provide a MBTA Charlie card of equivalent value of a monthly pass to each new household after the household has established residency;
2. Make available public transportation schedules, which will be posted in a centralized location for residents;
3. Provide bike racks for residents;
4. Provide information on available pedestrian and bicycle facilities in the vicinity of the project site. This information will be posted in a centralized location;
5. Charge for parking at market rates;
6. Promote MassRIDES to residents to arrange carpool matching between residents of the project and other neighborhood residents; and,
7. Promote nearby Zipcar locations to residents (one is located on Fuller Street).
