Subject: Re: 1299 Beacon Street Proposal

Thanks, Maria. I wanted my comments about the developer on the record. Also, wanted the police to take notice. Barbara

> We attended the 6/12 zoning board meeting regarding the development of 1299 Beacon Street. The comments by the developer raised questions. The developer commented that the Brookline Police chief agreed with him that currently traffic and safety are not serious issues on Sewell Street. We would like the Brookline Police to answer questions about the traffic and safety issues of the area. The developer commented that most of the traffic impact would be to Beacon Street. The proposed plan appears to have all vehicular traffic entering and exiting through Sewell Street. Overall, the developers comments were confusing and did not answer our questions and concerns about adding considerable traffic to this area.
