Hello,

I am a member of Brookline for Everyone, and I am writing to support zoning for new housing at 500 Harvard St in Brookline. It is a prime spot for affordable housing development, both walkable and transit-accessible. It is current under-utilized, housing only a parking lot and a one-story restaurant. I wish there would be room in it for the restaurant that is currently on the lot, and I wish there would be more than 5 affordable units in the building, but even without more affordable units and more commercial space, it is a project worth developing. I hope the zoning committee will approve its development.
