**Subject:** RE: 500 Harvard: parking update

Maria,

One ADA space will likely be a little better. I did a quick run with the ADA space centered on the 24' width and it took 6 maneuvers opposed to 8 to get the car turned around 180 degrees to exit.

I am unfortunately not available Wednesday evening; my wife has a work commitment so I will be on kid duty. If you'd like to have a call to touch based on anything before Wednesday, please let me know and we can schedule a time to talk.

Thanks,

**Brandon C. Schrenker, PE**
