

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Westbourne Terrace Bartlett Street Washington Street	<p><u>Driscoll School Traffic Calming Project:</u> Designed to improve safety on streets adjacent to the Driscoll School, this project resulted in the construction of four chokers and the marking of a pedestrian crossing and bicycle lane on Westbourne Terrace. The intersection of Westbourne Terrace with Bartlett Street was also reconstructed and inlaid brick crosswalk placed on Bartlett Street. As part of this project, curb extensions and crosswalks were also installed on Washington Street at its intersections with Salisbury Road and Bartlett Street. Evaluation of the traffic calming measures on Westbourne Terrace performed by Beta Group, Inc. and DPW staff (volumes and speed counts) in 2005-2006.</p> <p>Driscoll School Traffic Calming Project Steering Committee met in May 2006 with Board of Selectmen asking that traffic calming commitments be completed on Washington Street and that vertical devices be installed on Westbourne Terrace. In response, DPW prepares engineering plan for curb extension on Washington Street at Downing Road and the Transportation Board approves (a) installation of STOP signs on Westbourne Terrace at intersection with Bartlett Street, (b) installation of new crosswalk w/ramps on Westbourne at location of choker in front of the school; and (c) multiple sign improvements.</p>	Completed 2001 Completed 2006
Reservoir Road	<p><u>Heath School Traffic Calming Project:</u> An evaluation of conditions on Reservoir Road was performed by Howard/Stein-Hudson (HSH) in Spring 2002 in response to concerns over motorist speeds at the school. Additional vehicle speed and volume data were subsequently collected by DPW staff. Illegal school drop-off and pick-up activities on Reservoir Road found to contribute to safety concerns, and have since been addressed by changes made on Elliot Street in front of the school. Issues brought up initially may need to be revisited in future.</p>	No Action Taken
Beverly Road Russett Road	<p><u>Baker School Traffic Calming Project:</u> Concerns over one-way street pattern instituted during winter snow periods lead to review of traffic speeds and pedestrian safety in the vicinity of the school. As a result, speed limit signs and a speed advisory board were installed at the location of the existing school speed zone sign on Beverly Road, and the time period for the school flashers extended. Modifications were also made to parking in front of the school. Upgrades to traffic controls and pedestrian crossings at the intersection of Beverly Road with Independence Drive/Russett Road were also initiated under a separate study (see below).</p> <p>A 4-way STOP-controlled intersection was also created at Russett Road/Grassmere Road/Thornton Road so that motorists traveling on Russett Road would have to slow and stop for students/pedestrians when driving between Independence Road and VFW Parkway.</p>	Completed 2004

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Devon Road Middlesex Road Norfolk Road Circuit Road	<p><u>Brimmer & May School Traffic Calming Project:</u> This project involved the designation of Devon Road as a one-way street from Norfolk Road toward Middlesex Road, and the creation of a No Parking zone on the south side of the street. These actions were necessary to eliminate (a) the vehicular safety hazard that existed at the 90° turn on Devon Road; (b) the obstructions that parked cars presented to the safe and efficient movement of emergency vehicles (especially fire); and (c) the vehicular-pedestrian conflicts that resulted from motorists (especially Brimmer and May parents) using resident driveways to reverse direction on the street.</p> <p>To address vehicular safety issues, no parking/tow zone restrictions were also imposed on Circuit Road, Norfolk Road and Middlesex Road, and STOP signs installed at several area intersections.</p>	Completed 2004
Emerson Street Waverly Street Davis Avenue Thayer Street	<p><u>Emerson Gardens Neighborhood Traffic Calming Project:</u> Residents living on streets adjacent to Emerson Park expressed concern over motorists speeding by the park and the use of Emerson Street and Thayer Street as a commuter route to avoid the signalized intersection of Cypress Street/Washington Street. A Preliminary Evaluation and Needs Assessment was completed in 2001-2002. In March 2006, the Transportation Board adopted a traffic safety improvement plan that included (a) the extension of curb lines and installation of ADA-compliant ramps and crosswalks at the intersection of Emerson Street/Waverly Street/Thayer Street; (b) the installation of pedestrian in crosswalk signage at all marked crosswalks in the neighborhood; and (c) the installation of speed advisory signs on Davis Avenue.</p>	Completed 2006
Kenwood Street Russell Street Coolidge Street	<p><u>Coolidge Park Neighborhood Traffic Calming Project:</u> Residents living in the vicinity of Coolidge Park requested that traffic calming measures be implemented on streets leading to and adjacent to the park - i.e., Kenwood Street, Columbia Street, and Russell Street. A preliminary evaluation of conditions in the area was completed in 2004, and a neighborhood traffic and pedestrian safety plan adopted by the Transportation Board in September 2005. The adopted plan called for (a) the installation of two temporary speed humps on Kenwood street; (b) the installation of new ramps and crosswalks at the intersections of Columbia Street with Kenwood Street and Russell Street; and (c) the installation (relocation) of new pedestrian warning signage on the streets.</p> <p>Permanent speed humps on Kenwood Street replacing the seasonal humps.</p>	Completed 2006

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Rawson Road Gardner Road Blake Road	<p>Neighborhood Traffic Calming Project: Residents living in the vicinity of the complex intersection of Rawson/Gardner/Blake Roads requested installation of a mini-traffic circle to address safety concerns at the location. Following DPW evaluation of conditions, and with approval of neighborhood residents, the Transportation Board approves installation of a STOP sign on the Blake Road approach to the intersection.</p>	Completed 2006
Grove Street Allandale Road South Street Independence Drive	<p>South Brookline Traffic Calming & Pedestrian Safety Project: Following consultant studies that began in June 2004 and several neighborhood meetings, final design plans are developed by DPW and adopted by the Transportation Board for intersection traffic signal and geometric improvements at the following three intersections:</p> <p>(1) Independence Drive/Beverly Road/Russett Road: upgrade of the existing traffic signal and modifications to intersection geometry to provide for safer pedestrian crossings to/from Baker School and vehicle turn movements;</p> <p>(2) Grove Street/South Street: major reconstruction of the intersection that will provide for safer pedestrian crossings and vehicular movements; (3) Grove Street/Allandale Road: installation of a new traffic signal with all associated geometric improvements (turn lanes, pedestrian crosswalk) to the intersection; coordination with traffic signal at Newton/Grove.</p> <p>To ensure safety of students walking to Baker School from Clearwater Road area, Transportation Board also approves installation of new crosswalk with appropriate advance warning signage on South Street at intersection with Intervale Road and Grassmere Road.</p>	Completed 2007
Woodland Road Hammond Street	<p>Woodland Road at Hammond Street Intersection: Residents requested traffic calming measures to address high volume of cut through traffic, motor vehicle speeds, and lack of pedestrian accommodations on both sides of Woodland Road. An Initial Needs Assessment was completed in 2016 and a final plan was approved by the Transportation Board in March 2019 following two neighborhood meetings in November of 2016 and 2017 and a Transportation Board meeting in March of 2018. The approved plan includes:</p> <ul style="list-style-type: none"> • Continuous ADA compliant sidewalks on southern curb for the complete length of the roadway • Radar Speed Display Board and 20mph Safety Zone speed limit west of Hammond Street • 3 raised speed humps east of Hammond Street & crosswalks • Crosswalks & ADA ramps at cross streets • Intersection tightening, crosswalk, pedestrian refuge island, and rectangular rapid flash beacon at intersection of Woodland @ Heath St east of Hammond Street • Road diet on Hammond Street with buffered bike lanes 	Approved 2019 Woodland Road Expected 2021 Hammond Street Awaiting Funding approval from Town Meeting

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Beacon Street	<p><u>Beacon Street Reconstruction and Enhancement Project:</u> Reconstruction of Beacon Street from Ayr Road (Cleveland Circle) to St. Mary's Street (Audubon Circle) will result in a new, coordinated traffic signal system; roadway and sidewalks reconstruction with accessibility provisions for the disabled; bicycle accommodations; and reconfigured intersections that will reduce the conflicts, and thereby improve safety, for pedestrian, vehicular and MBTA trolley traffic.</p>	Completed 2010
Town-wide	<p><u>DPW Crosswalk Policy and Design Guidelines:</u> In 2005, a team of WPI students compiles an inventory of crosswalk conditions in Brookline and present their findings to DPW. Based on findings, DPW developed a crosswalk policy and design guidelines, and public hearings were held by the Transportation Board in June 2005, May 2006 and July 2006. The guidelines describe the warrants and criteria for the installation of marked crosswalks and the design specifications for crosswalk markings and signage at different locations (e.g., intersections/mid-block locations, school/non-school zones). Transportation Board approval anticipated in Fall 2006.</p>	Adopted September 2006
South Brookline	<p><u>Traffic & Pedestrian Safety Evaluations:</u> An inventory of conditions and safety evaluation was performed in 2005 by a consultant team at the following locations: (a) the intersection of Newton Street at West Roxbury Parkway; (b) Putterham Circle; and (c) Horace James Circle. A series of short-term and long-term improvement alternatives were identified at each location. DPW is seeking the commitment of area developers whose proposed projects would impact the locations to fund and implement many of the short-term improvements. Action on long-term recommendations will be contingent on cooperation of Mass. Department of Conservation and Recreation (DCR) and significant state funding.</p>	Horace James Circle Completed in 2015 Concepts provided to DCR for consideration on their right of way
Clark Road	<p><u>Traffic & Pedestrian Safety Evaluations:</u> Residents have filed request with the DPW - Transportation Division to install speed bumps on Clark Road at near (1) intersection with Cottswald Road; and (2) near bend in road in front of 169 Clark Road. Speed and volume counters were placed on roadway in May 2007 and staff recommended, which was subsequently adopted by the Transportation Board, to install a Crosswalk with ADA compliant wheelchair ramps, signage, and in street pedestrian crossing stanchion across Clark Road at it's intersection with Cottswald Road.</p>	Completed 2008

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Washington Street Gardner Road	<p><u>Traffic & Pedestrian Safety Evaluations:</u> Due to residents request concerning pedestrian and vehicular traffic safety at the intersection of Washington Street and Gardner Road the Transportation Board has taken the following steps: 1) In 2006 they installed pedestrian crosswalk and advanced warning signage; 2) In May 2007 the Board voted to install Curve Advisory Speed Limit and Chevron Alignment signage on Washington Street, Do Not Enter signage on Gardner Road, and lane markings on Gardner Road.</p>	Completed 2007
	<p>Further evaluation including recording speed and volume data, studying traffic and pedestrian movement patterns, and noting the geometric layout of the intersection was conducted in the Fall of 2007 by the DPW - Transportation Division staff. A proposed redesign of the intersection to improve pedestrian safety and slow vehicular speeds was presented to the Transportation Board and other Town departments for approval in December 2007. This adopted plan includes curb extensions on Gardner Road and Washington Street, 3 crosswalks with ADA compliant wheelchair ramps, 2 pedestrian refuge islands on Washington Street, and the relocation of the northbound bus stop out of the intersection to improve sight distance.</p>	Completed 2008
	<p>Based on vehicle site lines, motor vehicle speed, and crash history Town staff developed a pedestrian safety plan that included installation of Rectangular Rapid Flash Beacons and ADA compliant wheel chair ramps.</p>	Completed 2020
Button Village Neighborhood	<p><u>Traffic & Pedestrian Safety Evaluations:</u> Due to residents request concerning pedestrian safety crossing Goddard Avenue into Larz Anderson Playground, the DPW - Transportation Division investigated the possibility of installing new crosswalks across Meadowbrook and Goddard to improve access between Larz Anderson and the Button Village Neighborhood. Traffic investigation including recording speed and volume data, studying traffic and pedestrian movement patterns, and noting the geometric layout of the intersection was conducted in the Fall of 2007 by the DPW - Transportation Division staff. A crosswalk at Meadowbrook was ruled out because the necessary sight distance was not present. Instead a new crosswalk and ADA ramp will be installed across Goddard near the stairway entry to the play area. This plan was approved by the Parks & Recreation Commission and construction will be completed in the future.</p>	Completed Summer 2008
Riverway Island Neighborhood	<p><u>Traffic & Pedestrian Safety Evaluations:</u> Due to residents request concerning pedestrian, bicycle, and vehicular safety, the DPW - Transportation Division is investigating the possibility of installing traffic calming measures on Netherlands Road and Parkway Road. The Division is also investigating the Bicycle Advisory Committee's request to install a Contra-flow Bicycle Lane on Netherlands Road allowing two-way bicycle travel between Parkway Road and Aspinwall Avenue. Traffic investigation including recording speed and volume data, studying traffic and pedestrian movement patterns, and noting the geometric layout of the intersection will be conducted in the Spring of 2008 by the DPW - Transportation Division staff. A final plan was approved by the Transportation Board in 2008 with full support of the neighborhood and Bicycle Advisory Committee.</p>	Completed Summer 2009

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Columbia Street	<p>Traffic & Pedestrian Safety Evaluations: Due to residents request concerning pedestrian safety crossing Columbia Street into Coolidge Park, the Transportation Division investigated the possibility of installing a new crosswalk across Columbia Street into the entrance to the playground area. Traffic investigation included the study of vehicle stopping distance, pedestrian site lines, and geometric layout of the roadway and sidewalk grades. The Transportation Division created a plan for a safe crossing which included ADA ramps, ADA detectable warning strips, and in-street pedestrian crossing stanchions.</p>	Completed Summer 2009
Stedman Street	<p>Pedestrian School Zone Safety Evaluations: Due to residents request concerning pedestrian safety crossing along Stedman Street in the vicinity of the Devotion School, the Transportation Division investigated the possibility of improving school zone safety in accordance with the federal Safe Routes to School guidance program. Traffic investigation included the collection of vehicular speed and volumes, accident data, vehicular sightlines, pedestrian movement patterns, and existing school zone signage. The Transportation Division created a plan which improved the existing intersection of Beals/Stedman/Gibbs with new ADA compliant ramps, ADA detectable warning strips, signage, and crosswalks. The plan also included three new safe crossings on Stedman Street with chokers, ADA ramps, ADA detectable warning strips, pedestrian signage, school zone advisory signage, and a school zone speed flashing signal.</p>	Completed Summer 2010
Brookline Avenue School Zone Speed Flashing Signals	<p>Traffic & Pedestrian Safety Evaluations: Due to a request by the Brookline School Department and Brookline Police Department for improved school zone signage for the Lynch Center on Brookline Avenue, the Transportation Division developed plans for the installation of 2 School Zone Speed Flashing Signals on Brookline Avenue in the vicinity of the Lynch Center.</p>	Completed Summer 2008
Welland Road	<p>Traffic Safety Evaluations: Due to a request by the residents of Welland Road and a positive vote by the May 2009 Town Meeting requesting the installation of speed humps (originally planned, but abandoned in 2001) to slow vehicular traffic to 20 mph, the Transportation Division investigated the possibility of installing safety improvements on the roadway to slow the speed of vehicular traffic on the portion of Welland Road between Stanton and Tappan Street. Traffic investigation included the collection of vehicular speed and volumes, accident data, and geometric layout of the roadway. Per the request of the Transportation Board vote of December 22, 2009, the Transportation Division created a plan which included 2 new STOP signs and 2 Massachusetts Department of Transportation - Highway Division approved speed humps to slow the vehicular traffic to a 20 - 25 mph rate along the corridor.</p>	Completed Summer 2010

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Pond Avenue, High Street Corridor	<p>Traffic & Pedestrian Safety Evaluations: Due to a request by the High Street Hill Neighborhood Association and other residents for improved pedestrian safety on Pond Avenue at crossing points into the park as well as improved pedestrian and vehicular safety on High Street, the Transportation Division performed an initial investigation of the installation of a 4-way STOP controlled intersection on High Street at Allerton Road following 5 vehicular accidents within 5 months. The intersection met MUTCD warrants and a plan was approved in January 2009 by the Transportation Board. Other measures taken included improved signage including the installation of an in-street pedestrian crossing stanchion at the existing crosswalk on High Street at Highland Road.</p> <p>Due to residents request concerning pedestrian safety crossing Pond Avenue linking the neighborhood with the Oldmstead Park; vehicular speeds on both High Street and Pond Avenue; and pedestrian safety crossing High Street at Highland, Irving, and Allerton the Transportation Division investigated the possibility of improving safety in accordance with the federal MUTCD and state MassDOT guidance. Traffic investigation included the collection of vehicular speed and volumes, accident data, vehicular sightlines, pedestrian movement patterns, and existing signage. The Transportation Division created a final plan which included 5 raised crosswalks along Pond Avenue with ADA compliant ramps to increase pedestrian safety and lower vehicular speeds; a new crosswalk with ADA compliant ramps on High Street at Allerton Street; a new crosswalk with ADA compliant ramps and an In-street Pedestrian Sign on High Street at Irving, new Advisory 20 mph speed limit signage on High Street, a radar speed display board on High Street, and a re-alignment of the intersection of High Street @ Highland Ave.</p>	Completed 2009
Runkle School	<p>Traffic & Pedestrian Safety Evaluations: As a requirement of the Zoning Board of Appeals decision regarding the construction of the new Runkle School, the Transportation Division investigated the possibility of improving school zone safety in accordance with the federal Safe Routes to School guidance program. Traffic investigation included the collection of vehicular speed and volumes, accident data, vehicular sightlines, pedestrian movement patterns, and existing school zone signage. The Transportation Division created a plan which improved the existing intersections of Dean Road @ Druce, Dean Road @ Clinton, Druce @ Buckminster, and Clinton @ Chesham with new ADA compliant ramps, ADA detectable warning strips, signage, curb extensions and crosswalks. The plan also included the creation of a safe drop off and pick up zone on Druce, Chesham, and Clinton Streets.</p>	Completed Fall 2012
Town-wide	<p>Review and update of the Town of Brookline Traffic Calming Policies and Procedures by the Transportation Board.</p>	Completed Summer 2012

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Mason Terrace Lancaster Terrace	<p><u>Traffic & Pedestrian Safety Evaluations:</u> Residents submitted a request with the DPW - Transportation Division to install an all way STOP control at the intersection of Mason and Lancaster Terrace and to provide safe pedestrian crossing across both streets to connect Summit Path. After meeting with the neighborhood staff developed a plan that included a new sidewalk, new crosswalks, intersection realignment, and new ADA compliant ramps. The plan was approved by the Transportation Board in February 2011.</p>	Completed 2012
South Street	<p><u>Traffic & Pedestrian Safety Evaluations:</u> In response to neighborhood requests for traffic calming measures to be installed as part of the roadway reconstruction project, staff conducted a safety improvement needs assessment for South Street that included traffic volumes and speeds, accident history, and pedestrian movements. Following several neighborhood meetings a staff preferred plan to slow vehicular traffic and increase pedestrian safety. The plan included new sidewalks, crosswalks with ADA compliant ramps, curb extensions, in-street pedestrian crossing stanchions, intersection realignments, and a neighborhood traffic circle at the intersection of South, Intervale, and Grassmere Roads. The Transportation Board approved the plan in March 2010.</p>	Completed 2010
Heath Street	<p><u>Traffic & Pedestrian Safety Evaluations:</u> The Chestnut Hill Village Associates neighborhood association submitted a safety improvement request to address the traffic speed and volume of vehicular traffic and pedestrian safety on Heath Street between the townline and Hammond Pond Parkway. Because of the impending construction of the Chestnut Hill Square development, which will alter the traffic patterns of the neighborhood, in September 2011 the Transportation Board approved an interim plan to address the blocking of the intersection of Heath Street @ Arlington and Belmont Roads by installing a DO NOT BLOCK THE BOX pavement marking and signage. To address speeds and volume of eastbound commuter traffic during peak am periods they also approved the use of the seasonal speed humps in two locations. To help offset the cost of this project the developer of Chestnut Hill Square included \$50,000 in his mitigation package.</p>	Completed 2016

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Heath Street Hammond Street	<p>Traffic & Pedestrian Safety Evaluations: As part of the mitigation package for the Chestnut Hill Square development in Newton, MA the developer offered to pay for intersection improvements at Woodland Road and Heath Street near the development site. This agreement was in response to concerns expressed by area residents that vehicular speeds created unsafe conditions for both motorists and pedestrians in the area. Transportation Division staff refined a concept design provided by the developer's consultant, VAI, that would slow turning traffic and improve pedestrian safety through intersection re-alignment, pavement markings, and two new crosswalks with ADA compliant wheel chair ramps. The plan was adopted by the Transportation Board in December 2013 and is expected to cost \$127,000.</p>	Completed Fall 2014
Lawton Street	<p>Traffic & Pedestrian Safety Evaluations: Residents of Lawton Street have requested the installation of STOP control signs at the intersection of Lawton Street, Thorndike Street, Abbotsford Road, and Hamilton Road. Although the STOP control was warranted the Transportation Board expressed a desire to reconstruct the large intersection to improve vehicular, bicycle, and pedestrian safety through geometric changes and not signage.</p>	Needs Assessment Completed 2018 No Action Taken
Harvard Avenue	<p>Traffic & Pedestrian Safety Evaluations: Residents of Harvard Avenue reported unsafe conditions for pedestrians, especially school age pedestrians, on Harvard Avenue as they cross the street to enter Pierce Playground due to excessive speeding vehicles. They also report unsafe pedestrian conditions on portions of the sidewalks which narrow due to mature trees which they want addressed without the need for tree removal.</p>	Needs Assessment Completed 2017 Advisory Speed Signs Installed
Wallis St Wolcott Rd Wolcott Rd Extension	<p>Complete Streets Evaluation: As part of the roadway reconstruction for the following streets staff developed complete streets concept designs to improve pedestrian safety by creating new crosswalks at realigned intersections to reduce the crossing distances. The new designs were opposed by the majority of residents in attendance at the April 2018 Transportation Board meeting and the Board voted an exemption to the Complete Streets Policy directing staff to only do the minimum of painted crosswalks with ADA compliant wheel chair ramps and signage as well as fill in the missing sidewalk connections.</p>	No Action Taken by vote of the Board following public comment 2018

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Babcock Streett	<p><u>Complete Streets Evaluations:</u> Beginning in June 2015, as part of the reconstruction of Babcock Street, the Transportation Board engaged Town staff, residents, merchants, advocates, Town Meeting Members, and other interested parties to develop a complete streets design for Babcock Street that would improve roadway safety for pedestrians, cyclists, and motorists. The final design includes new crosswalks across Babcock Street with curb extensions and a Rectangular Rapid Flash Beacon at Devotion St as well as new bicycle accommodations including northbound sharrows and southbound bike lane.</p>	Completed 2020
Intersection of Tappan Street @ Blake Street	<p><u>Traffic & Pedestrian Safety Evaluations:</u> As part of the Tappan Street roadway reconstruction project the intersection of Blake Street and Tappan Street was altered to improve traffic and pedestrian safety near Brookline High School. Improvements included a curb extension, lane reduction via an expansion of the divider island, new crosswalks with ADA compliant wheel chair ramps and signage.</p>	Completed 2017
Intersection of Gardner Rd @ Blake Street	<p><u>Traffic & Pedestrian Safety Evaluations:</u> As part of the Gardner Road roadway reconstruction project the intersection of Blake Street and Gardner Road and Blake Street and Rawson Road were altered to improve traffic and pedestrian safety. Improvements included a new neighborhood traffic circle, curb extensions, and crosswalks with ADA compliant wheel chair ramps and signage.</p>	Completed 2017
Buttonwood Village	<p><u>Traffic & Pedestrian Safety Evaluations:</u> Neighborhood residents requested an investigation of the safety issues caused by increased cut through traffic between Clyde Street and Goddard Avenue during the morning and evening peak commute times. Evaluation included a speed and volume study as well as destination study based on license plates. While no speed issue was observed, the high number of cut through vehicles posed a safety concern and the Transportation Board approved peak hour turn restrictions with neighborhood support.</p>	Completed 2017

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Clyde Street	<p><u>Traffic & Pedestrian Safety Evaluations:</u> As part of the Clyde Street roadway reconstruction project the intersections of Clyde Street and Lee Street and Clyde Street and Warren Street were altered to improve traffic and pedestrian safety. Improvements included a curb extensions, lane reduction via an expansion of the divider islands, new crosswalks with ADA compliant wheel chair ramps and signage, and bypass cycle track.</p>	Completed 2017
Warren Street Chestnut Hill Avenue	<p><u>Pedestrian Safety Evaluations:</u> As part of the Safe Routes to School initiative 3 new crosswalks with enhanced Rectangular Rapid Flash Beacons were installed at desired crossing points for school aged pedestrians traveling to the Lincoln School and the Heath School.</p>	Completed 2017
Intersection of Walnut Street @ Chestnut St & Kennard Rd	<p><u>Pedestrian Safety Evaluations:</u> As part of the Safe Routes to School initiative the pedestrian actuated traffic signal at the intersection was approved to be upgraded to a full traffic signal following a motor vehicle accident with a school age child after the normal school hours.</p>	Completed 2019
Newton Street @ Princeton Road Lagrange Street @ Princeton Road	<p><u>Pedestrian Safety Evaluations:</u> As part of the Safe Routes to School and safe Routes to Parks initiatives, 3 sets of Rectangular Rapid Flash Beacons were installed at desired crossing points on Newton Street @ Princeton Road and Lagrange Street @ Princeton Road to facilitate safe walking for school aged children walking to the Baker School and Skyline Park.</p>	Completed 2019
Intersection of Naples Road @ Gibbs St	<p><u>Traffic & Pedestrian Safety Evaluations:</u> As part of the Babcock Street Roadway Reconstruction public process this intersection was discussed and geometric changes to the intersection were approved including an All Way STOP control, a new bike lane, a curb extension, and new crosswalks with ADA compliant wheelchair ramps and signage.</p>	Completed 2020

Safety Improvement Projects in Brookline

Street(s)	Description	Status 6/1/2021
Summit Avenue/ Corey Hill Playground	<p><u>Pedestrian Safety Evaluations:</u> Request by residents to address safety concerns created by high traffic volumes and speed on Summit Avenue in the vicinity of Corey Playground. To slow motor vehicle traffic and increase pedestrian safety, especially those seeking to connect to both sides of the park on either side of Summit Ave, two raised crosswalks, 20mph Safety Speed Zone, and advance park signs were approved.</p>	Complete 2020
Clinton Street	<p><u>Traffic & Pedestrian Safety Evaluations:</u> Request by residents to address safety concerns created by high traffic volumes and speed. Large portion of road included in Safe Routes to School program for the Runkle School. Initial Needs Assessment completed in 2019. Identified issues include lack of ADA compliant wheel chair ramps, lack of crosswalks at intersections, long crossing distances, wide curb radii allowing motor vehicles to make turns with minimal deceleration. Recommended to be done under the Complete Streets program given the roadway reconstruction is planned for 2019-2020.</p>	Construction
Winchester Street	<p><u>Complete Streets Evaluations:</u> Based on a roadway pavement reconstruction project, the Transportation Board engaged Town staff, residents, merchants, advocates, Town Meeting Members, and other interested parties to develop a complete streets design for Winchester Street that would improve roadway safety for pedestrians, cyclists, and motorists. The final design includes new raised crosswalks across Winchester Street, a new 20 MPG Safety Speed Limit zone in the vicinity of the Senior Center, new sidewalks and ADA compliant wheelchair ramps as well as new bicycle accommodations including northbound sharrows and southbound bike lane.</p>	Construction
Various Locations	<p><u>MA Funded Complete Streets Projects:</u> As part of the Town's participation in the Commonwealth's Complete Street program, administered by the Massachusetts Department of Transportation, Town staff designed and implemented pedestrian and bicycle safety projects including installation of curb extensions and rectangular rapid flash beacons on Harvard Street @ Harvard Avenue and Washington Street @ Greenough Street, curb extensions and new ADA ramps on Harvard Street @ Longwood Avenue and Harvard Street @ Vernon Street, as well as bicycle accommodations including left turn queue boxes at the intersection of Harvard Street and Beacon Street and a bike box on Harvard Street @ Babcock Street</p>	Completed 2020

Safety Improvement Projects in Brookline

Pending Requests in order of priority based on conditions in Traffic Calming Policy

Status 6/1/2021

*** Beverly Road**

New request by residents since the last review to address safety concerns created by high traffic volumes and speed on Beverly Road. Large portion of road included in Safe Routes to School program for the Baker School.

*** Warren Street**

Request by residents to address safety concerns created by high traffic volumes and speed from Lee Street to Walnut Street.

*** Buckminster Road**

Request by residents to address safety concerns created by high traffic volumes and speed from Sumner Road to the Runkle School. Large portion of road included in Safe Routes to School program for the Runkle School.

A second request is for an intersection realignment to improve safety @ Sumner Road intersection.

*** Orchard Road**

Request by residents to address safety concerns created by high traffic volumes and speed related to the Boston Public Schools.

*** Reservoir Road**

New request by residents to address safety concerns created by high traffic volumes and speed within the Heath School district.

*** Fuller Street, Coolidge Street, Thorndike Street**

Request by residents to address safety concerns created by high traffic volumes and speed from Commonwealth Avenue to Harvard Street.

Safety Improvement Projects in Brookline

Pending Requests in order of priority based on conditions in Traffic Calming Policy

Status 6/1/2021

*** Beals Street**

Request by residents to address safety concerns created by high traffic volumes and speed on Beals Street.

*** Upland Road**

Request by residents to address safety concerns created by high cut-through traffic volumes and speed.

*** Allerton Street, Cumberland Ave, Hawthorn Road, Glen Road**

Request by residents to address safety concerns created by high cut-through traffic volumes and speed.

*** Randolph Road**

Request by residents to address safety concerns created by high cut-through traffic volumes and speed.

*** Gardner Road**

Request by residents to address safety concerns created by high cut-through traffic volumes and speed on Gardner Road between Washington Street and Winthrop Road.

*** Reservoir Road**

New request by residents to address safety concerns created by high traffic volumes and speed within the Heath School district.

Safety Improvement Projects in Brookline

Pending Requests in order of priority based on conditions in Traffic Calming Policy

Status 6/1/2021

*** Wolcott Road, Wolcott Road Ext., Wallis Road**

New request by residents to address safety concerns created by high traffic volumes and speed.

*** St Paul Street between Beacon Street & Aspinwall Avenue**

Request by residents to address safety concerns created by high traffic volumes and speed

*** Worthington Road**

Request by residents to address safety concerns created by high traffic volumes and speed

*** Summit Avenue**

Request by residents to address safety concerns created by high traffic volumes and speed

*** Westbourne Terrace**

Request by residents to address safety concerns created by high traffic volumes and speed on the two way section between the townline and Bartlett Street
