

PETITION TO THE BROOKLINE BOARD OF SELECTMEN AND THE BROOKLINE ZONING BOARD OF APPEALS FOR HIGH-QUALITY, INDEPENDENT ENGINEERING ANALYSIS OF 40B PLANS TO EXPAND HANCOCK VILLAGE

Chestnut Hill Realty's proposal for expansion of Hancock Village includes the construction of a 140 unit, 7-story apartment building and replacing the green belt from the VFW Parkway to Baker School with roads, parking, and 9 buildings containing 42 units. The apartment building is 500 feet – almost two football fields –in length, and 7 floors tall. The number of units exceeds the total number of homes between Independence Drive and the VFW on Bonad, Russett, Asheville, and Grassmere Roads and South Street.

BLASTING: To construct the building, tons of puddingstone and ledge must be blasted and removed, with unknown impact on neighboring homes and infrastructure, including aging gas and water lines. The impact has not been evaluated. When asked by the Town's Zoning Board of Appeals whether the blasting will be "bearable" for the neighbors, BETA Group, Inc., the peer reviewer of Chestnut Hill Realty's consultant, noted that it will be "difficult" but "not impossible," and yet no analysis was done beyond a cursory assessment.

FLOODING: BETA Group noted the poor soil quality and poor water absorption on the green belt, but it was neighborhood residents, including a certified engineer, who found many of the faults in the way that the CHR analysis of flooding potential was carried out (e.g., only one boring carried out on one of the coldest days of the year). At the request of neighbors, a second boring was performed in April. However, the groundwater level still has not been determined with the best methods.

TRAFFIC: The majority of the new units will have only one primary egress, which is onto Russett Road via Asheville Road, both narrow local roads. Even though the number of units is more than 3 times the number of all the homes on Russett Road, the traffic impact did not concern CHR's traffic consultant.

We are aware that, because of CHR's influence as a major developer in the State and in Rhode Island, it was difficult to locate engineering firms that were willing to be peer reviewers of this project. We are also aware that if CHR's analyses and peer reviews left questions unaddressed or inadequately addressed that independent analyses would be obtained by the Town.

THEREFORE, we, as concerned Brookline residents who will be impacted by this proposed development through the negative consequences of blasting, potential flooding, and increased traffic, including structural damage to our homes, ask the Town to hire high quality independent consultants whose analyses and judgments will not be influenced by concern for loss of business, to carry out high quality independent and neutral analyses of these issues. If the only way to obtain such consultants is to hire from out-of-state, then we encourage the Town to do so.
