III. TAXI LICENSE REQUIREMENTS

A. Application Requirements for New Taxi Business License

1. Applications for a new Taxi Business License shall be made to the Transportation Board upon a form provided by the Transportation Division. The application shall include:
 - A. The name, home address, home phone number, business address and business phone number of the applicant.
 - B. Trade or company name under which the applicant proposes to do business; type of business entity; state of incorporation or organization; names and addresses of corporate officers.
 - C. A description of the number of Hackney Certificates being sought and the age and model year of the motor vehicle(s) to be used in the operation of the business.
 - D. A description of the proposed location of the principal place of business and dispatch service. The business location and dispatch service locations must be consistent with paragraph III.F.1 and all other requirements of these regulations.
 - E. A description of the facility to be used for the maintenance and repair of all licensed taxicabs.
 - F. A statement indicating whether the applicant proposes to hire drivers as employees, to lease its vehicles or services to self-employed independent contractors, or both.
 - G. If the license holder will be a corporation, the name of the responsible manager who, by written delegation of authority, shall have full authority and control of the licensed taxi business as the licensee could in any way have and exercise.
2. The Transportation Board will maintain applications for new Taxi Business Licenses in the chronological order in which they are received and deemed to be complete by the Transportation Division. An application will not be considered complete until all of the required information has been provided to the Town and the appropriate fee has been paid. The Transportation Division will maintain an up-to-date chronological list of the applications it receives for Taxi Business Licenses and make it available for public review at any time. Any application may be rejected or denied if it contains false information or is otherwise deemed incomplete.
3. Every application for a new Taxi Business License will be considered active for a period of one (1) year from the filing date of the application. If the Transportation Board has not acted upon an application prior to the one-year anniversary date of its filing, and the Transportation Division has not received a complete and updated application from the same applicant, the application will no longer be eligible for consideration. If the Transportation Division receives an updated application from the same applicant for a new Taxi Business License prior to the annual anniversary date of the application's previous filing, said applicant and application will continue to be maintained in the chronological order in which it was originally received. If the Transportation Division does not receive an updated application from the same applicant for a new Taxi Business License prior to the anniversary date of its previous filing, said application will be considered a first-time application and be placed in the chronological order based on its most recent date of filing.
4. The determination as to the availability of a New Taxi Business License shall be entirely within the discretion of the Transportation Board based upon the best interests of the Town. Among other things,

the Transportation Board may consider factors such as the size and type of passenger market(s) being serviced, the number of existing Taxi Business Licenses, the number of taxicab companies, the number of existing Hackney Certificates, and the availability of qualified taxicab drivers in making its determination of availability. The filing of an application for a New Taxi Business License or the consideration of such an application by the Transportation Board does not guarantee that a New Taxi Business License will be issued to the applicant or that one will become available or that a particular number of Hackney Certificates will be issued to the applicant.

5. If (a) the Transportation Board denies an applicant's request for a new Taxi Business License, (b) the Transportation Board denies an existing Taxi Business License Holder's request for renewal of an existing Taxi Business License, or if (c) an application is withdrawn; the applicant declines, refuses or otherwise fails to go forward on its application; or if the applicant declines to accept a Taxi Business License made available or granted by the Transportation Board, the Applicant may submit a new application to be placed in the chronological order in which it is then received and deemed complete by the Transportation Division unless the Transportation Board determines otherwise.
6. No application shall be deemed complete until the applicant has paid to the Town the appropriate application fee established by the Transportation Board.

A. Renewal of Existing Taxi Business License

1. If an existing Taxi Business License holder desires to renew said license, an application must be submitted to the Transportation Board at least 60 days prior to the expiration date of said license on a form provided by the Transportation Division. Said application for renewal must describe the present utilization pattern of the taxicab(s) currently in operation under the existing Taxi Business License, and explain why the renewal of said license is essential to meeting the transportation needs of the citizens of Brookline. If the renewal of the Taxi Business License seeks an increase in the number of Hackney Certificates allowed, the applicant must indicate the number of additional Hackney Certificates desired and describe the existing or projected geographic and passenger market(s) that would be serviced by the additional taxicabs.
2. When determining whether to renew an existing Taxi Business License, or to increase or decrease the number of Hackney Certificates issued under said License, the Transportation Board may consider, among other things: (a) the number of Code 4 safety violations found to exist on the taxicabs owned by the Taxi Business License holder during the most recent taxicab safety inspection; (b) the number of taxicabs the Taxi Business License holder has placed into operation during the previous year in comparison with the number of Hackney Certificates issued to the Taxi Business License holder; (c) the type and characteristics (e.g., fuel-efficient, low emissions) of the vehicle(s) the applicant proposes to place into service; (d) the number and type of citizen complaints received during the previous year by the Transportation Division or Hackney Officer involving taxicabs owned by the Taxi Business License holder; (e) the behavior of taxicab drivers employed by the Taxi Business License holder as reported by the Hackney Officer; or (f) the responsiveness of the Taxi Business License holder to complaints or information requests as reported by the Transportation Division.
3. The Transportation Board or the Transportation Division may request such other information as it deems necessary to make its determination on the renewal of a Taxi Business License or increases and decreases in the number of Hackney Certificates.

C. Limits on Total Number of Taxi Business Licenses and Hackney Certificates

1. The Transportation Board may establish, increase or decrease the total number of Taxi Business Licenses issued in the Town of Brookline; the total number of Hackney Certificates authorized under such Taxi Business Licenses; and the number of Hackney Certificates issued to any one Taxi Business License Holder. The Transportation Board may increase said total number of Taxi Business Licenses or Hackney Certificates at any time when, after notice and hearing, it is determined that such an increase is in the best interests of the Town. Reasons for increasing such Licenses or Certificates may include, among other things, better service to a specific geographic or passenger market(s) or the promotion and maintenance of competition among Taxi Business License holders. The Transportation Board may also decrease the total number of Taxi Business Licenses or Hackney Certificates issued at any time when, after notice and hearing, it is determined that such a decrease is in the best interests of the Town. Reasons for decreasing the number of said Licenses or Certificates may include, among other things, ensuring the safe, fair, and efficient use of taxicabs in the Town and maintaining the economic well-being of the taxi industry in the Town.
2. When the Transportation Board determines that a new Taxi Business License is available and that, in the best interests of the Town such a License should be issued, the Transportation Board will consider the first application that appears on the chronological list of license applications maintained by the Transportation Division. Consideration of an application by the Transportation Board does not entitle the applicant a Taxi Business License or a particular number of Hackney Certificates. The Transportation Board's consideration of an application for a Taxi Business License or the granting of a Taxi Business License does not entitle the applicant to all of the Hackney Certificates being sought and requested by said applicant in his or her Taxi Business License application and the issuance of a Taxi Business License or Hackney Certificates shall be subject to such conditions as the Transportation Board may establish. If an application is withdrawn; the applicant declines, refuses or otherwise fails to go forward on its application; or if the applicant declines to accept a Taxi Business License made available or granted by the Transportation Board, including such conditions as the Board may place on the License, including the number of Hackney Certificates to be issued under the License, the Transportation Board will consider the next applicant on the chronological list of license applications if it decides to consider any further applications at all.
3. If the Transportation Board determines that one or more Hackney Certificates are available, the Transportation Board may, within its discretion, decide whether and how many such Hackney Certificates should be allotted to existing Taxi Business License holders who have applied for additional Hackney Certificates, or to applicants for new Taxi Business Licenses. At no time, however, shall the number of Hackney Certificates issued to all Taxi Business License holders in the Town of Brookline exceed any limit or cap established by the Transportation Board at that time.

D. Nontransferability

1. No Taxi Business License or Hackney Certificate issued under these Taxi Regulations shall be sold. No Taxi Business License shall be assigned or transferred without the approval of the Transportation Board. Taxi Business Licenses or Hackney Certificates granted under these taxicab regulations shall be immediately surrendered to the Transportation Board during a period of suspension, after revocation, or if the taxicab company ceases to operate.
2. No Taxi Business License or Taxicab Dispatch Permit held by a corporation, association, partnership, individual, or other entity shall be transferred to another individual or entity except in accordance with the following procedure:

- A. An application for approval of the transfer of a Taxi Business License or Taxicab Dispatch Permit, and payment of the application fee, shall be filed with the Transportation Board prior to any transfer.
- B. The application for transfer shall include a new Taxi Business License or Taxicab Dispatch Permit application, with the application fee, as outlined in these regulations.
- C. Approval of the proposed transfer of the License or Permit will be contingent upon approval of the transfer application and a finding of applicant suitability and fitness by the Transportation Board.
- D. Any Taxi Business License or Taxicab Dispatch Permit transferred other than in accordance with this section shall be void and the Taxi Business License and Hackney Certificates surrendered at once to the Transportation Board.
